

Flow Rates

TB-S40 Ceramic Mixer with TOPLISS Showerheads

Flow Rates are indicative only - pressure regulators and limiters differ in accuracy and restriction. Frictional loss in longer pipe runs may be significant, requiring an increase in pipe size.

Showerhead Flow (litres/min) at static pressure

<i>Showerhead Model</i>	20 kPa	37 kPa	76 kPa	350 kPa	500 kPa
100 Fixed Flow	5.4	7.2	9.4	14.8	21.6
110 Classic/120 Ultra Fixed Flow	6.0	7.6	9.8	14.4	22.2
130 V/Jet Ultra	5.3	7.0	9.6	14.0	21.0
131 Ultra Two-Way Shower	5.2	6.8	9.2	14.0	18.8
141/145 Sliding Rail - Fixed spray	5.4	6.8	9.2	13.6	19.2

Notes:

Varijet showerheads can be turned down to still give a good spray at minimal flows. eg. 4 litres/min.

Kit #009 (Economiser flow regulator) gives a maximum flow of 8 - 10 litres per minute. (Fits models 110, 120, 130 & 131 roses)

The TB-S40 also has an adjustable flow limiting screw.
