

Flow Rates TB10 ELP & EHP Mixers with TOPLISS Showerheads

Flow Rates are indicative only - pressure regulators and limiters differ in accuracy and restriction.
Frictional loss in longer pipe runs may be significant, requiring an increase in pipe size.

Showerhead Flow (litres/min) at static pressure

Showerhead Model	1m Head	2m	3.5m	350kPa (EHP)	500kPa (EHP)
100 Fixed Flow	5.5	7.5	10	10	14.5
110 Classic	6.5	8.5	10.5	10	14
120 Ultra F/Flow	6	8.5	10.5	10	15
130 Ultra Varijet	6	8.5	10.5	10	14
131 Varijet Head	5	7	9.5	10	14
131 Hand Piece	4	6	7	10	14
141/145 Slide Showers	5	7	9.5	10	14

Notes:

Varijet showerheads can be turned down to still give a good spray at minimal flows. eg. 4 litres/min.
Kit #009 (Economiser flow regulator) gives a maximum flow of 8 - 10 litres per minute. (Fits models 110, 120, 130 & 131 roses)
